

EvoChem

Versatile range of cleaning and sanitising systems

Highly versatile range of cleaning and sanitising systems offering simplicity, durability and outstanding value with a cleaning performance second to none.

EvoChem is ideal for use in all heavy duty cleaning applications, including food processing, restaurant kitchens, hospitals, abattoirs, dairies, vehicle washing.

- 1 or 2 products, with rinse facility
- Choice of backflow prevention devices – double or triple check valve available
- Choice of guns and lances for spraying and foaming
- Retractable hose reel option
- Chemical container racks hold x2 standard 5ltr containers or x1 standard 10ltr container
- Integrated hose hanger
- Frost protection shroud available

Accurately

- The right results from the foaming chemical – every time the unit is used – achieved through:
- The widest range of metering tips in the industry ensures the EvoChem can match your required dilution rate
- Excellent, easily directed product throw as spray or foam

Safely

- Patented dual educator technology
- No accidental mixing of chemical products
- Correct dilutions safeguard the surface being cleaned against potential damage caused by excessive dilution strength

Easily

- 10 or 15 metre PVC or SBR hose
- Supplied ready to use
- Supplied ready-to-fit, with fixing kit for ease of installation
- intuitive operation for any user

Economically

- No chemical wastage
- Optional water inlet hoses with self-cutting taps designed to reduce installation time even further

Reliably

- Enables you to comply with all hygiene regulations; HACCP etc.
- Every unit individually factory-tested to guarantee reliability of operation

- Lime scale-resistant venturi eliminates need for de-scaling in hard water areas
- Metering tips with tight production tolerance guarantee consistent dilution performance
