

Chemilizer Adjustable Pump

Adjustable Ratio Pump

The Adjustable Ratio Pump will retrofit to any Chemilizer. It is perfect for injecting medications, vaccinations, or nutrients into your livestock drinking system. You can then switch to acids or cleaning chemicals to clean system lines at a different injection rate.

The Adjustable Pump will adjust to your injection rate with a simple twist of the setting ring!

- Simple 1/4 turn installation
- Intuitive ratio adjustment controls
- Ultra durable Kynar inner housing
- Adjusts from 2.0% - 0.6% (AV2 versions)* and 5.0% - 1.6% (AV1 version)

* In order for the 50:1 to 164:1 (2.0 to 0.6%) adjustable lower end to work, it must be installed onto a Chemilizer pump that features the brass inserts.

Part Number	Description	Injection Range	
		%	Ratio
HYDCH9000-AV2	Chemilizer with adjustable Viton Pump	2.0 - 0.6	50:1 - 164:1
